Your Choice of focomotion

Ever since Mary Roberts Rinohart wrote about her wonderful camping trip through Olderie National Park with that prince of guides, Howard Eston, the idea has been fostered by other writers and artists that the way to see this sublines wilderness is by following its famoust trails on horsebacke or sloot. True, Glaster Park is the trail riders' paradits, and the Olderle Park Country offers incompassible camping trips. But for horseback, there are available many trips within the park by but and motor leauch. Chalets.

AND VERY Special Views FROM THE Pakes

It is no exaggeration to say that one of the outstanding delights of Glacier National Park is its wealth of glamorous alrine lakes. But these lakes do more than contribute to the indescribable beauty of this region, for they offer vantage points from which to see mountains, waterfalls and some of the glaciers in their true perspectives. It is no wonder that so many artists pitch their easels on the shores of these lakes, nor that expert photographers (as well as novices) love to take pictures from the boats.

out of Goot Maxistain the Statets of Going-te-theloss occasional incomparsite vicene up and doors and across St. Mary Lake.

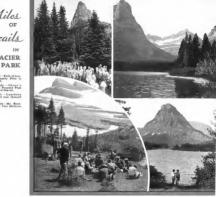

A Unique Feature of GLACIER PARK

It has been said the Rocky Mountains of Glacier National Park reproduce the stirring profiles of the Canadian Rockies farther north, with a more peofus use of color by Nature, the master artist. It has also been said by many world travelers that nowhere, as we to some extent in the Swint Alpa, are there lakes of much variety and charm. Some of these lakes are hidden genus that you come upon suddenly while others you follow for miles are you travel through this region. Most of them offer fire truet fishing.

Eastern Entrance . . .

GLACIER PARK HOTEL

Here trails invite you to ride a hike

The "Big Trees Lodge," as the Blackfeet Indians have so aptly manded the Gacer Park Hotel, is fashooned out of huge fir trees and until the second out of huge fir trees and until, the man building, housing the lobby, dining room and recreation hails, and the annex containing the sleeping rooms. Accommon dations are provided for 400 guests, with all the essentials supplied by the most modern metropolity.

The Glacuer Park Hotel, in common with other hotels and chalets in Glacuer National Park, is conducted on the American plan.

This hotel is located less than a city block from Glacer Park Station, the eastern entrance to the Land of Shiming Mountains, and while it is operated primarily as a case is operated primarily as a case is operated primarily as called the leaving the mountains, its delight leaving the mountains, its delight surroundings and its opportunities for hiking, riding, and golf an which to stop, either before or after touring the Park.

There is a sporty mine-hole golf course at Glaicer Park Hotel Flanked by the steep eastern wall of the Rockies, the course coupses a natural golf terrain with Two Medicine River on one side and Midwale Creek on the other Fair ways and greens are well kept, the whole course being watered Paris 36

Within a short radius of this hotel there are many interesting objectives for riders and hikers, while the country just east and south of this point is part of the Blackfeet Indian Reservation and guests of the hotel are always we comed at the Indian encompments. those desiring to make short rides in this area saddle-horses may be rented for either a half day period or for a full day There are also a number of standard side trins. The shortest of these is the trip to Forty Mile Creek, an eight mile ride through the foothills which takes from three to four hours. A second. a the trip to Scenic Point on Mt Henry, where a marvelous view of the Two Medicine Valey and the Blackfeet Indian Reservation is to be had. This ride takes a full day and a box lunch a carried

These two trips take in sections of the Mt. Henry trail to Two Medione Lake, which is followed on the two-day trip to Two Medicine Chalers and return. This trip starts from the Glacier Park Hote. shortly after breakfast on the first day. The route is first along the old mountain road back of the hotel, but soon branches off on to the Mt. Henry treal to clumb through the tumber and over Bald Hill. It crosses both Forty-one Mile and Forty Mile creeks before climbing the slopes of Mt Henry to Scena Point From here it drops into the Two Medicine Valley, past Appistoki Fails, to the chalets on Two Medicine Lake The return trip, which is made the second day. follows the auto road through the lower levels of the valley, branch my off to view Tock Falls one of the scense marvels of this region

In the first valley north TWO:MEDICINE CHALETS

Beautiful lakes AND mountains

The Two Medicine is the first of the 'minde' valleys that mark Glacer Park's eastern stopes. Here the three charming lakes of the Two Medicine River rus by a series of steps into the mountains, the upper lake nesting immediately under the Continental Divide.

The middle or Two Medicine Lase of this chain is a center of great beauty, hermined in as it is on every side by great peaks, some of which rise nearly a mix above the level of the lake. To the north Rising Wolf Mountain dominates the sky line, while to the west and south are the colorful masses of Mt. Helen, Pumpely Pilar, Mt. Rock well and Apostok Peas.

The Two Med cine Chacts, an attractive group of log buildings to cated on the southeast shore of this lake, consist of a central chalet housing the duning and lounging crosms and a number of small chalets containing living and steping rooms. The buildings are all electric lighted and they are heated by large Breighear. There is run and hot water will be delivered on request

The many delightful short excursions into the mountains, the excellence of the fishing in the near-bylakes and the quality of the accommodations at the Two Medicine Chalets make this an ideal spot for those who desire an extended vacation of the "dude ranch" type.

Horses and guides for a number of scheduled one-day trips may be

engaged at the chalets. One of these is the trip around Rising Wolf Mountain and up Dry Fork Creek to Cut Bank Pass on the northeast side of Mt. Morens

Possibly the most interesting of the non-day trips in this area is the ride to the top of Dawson Pass with its far flung panoramas of plans and mountains Starting from the chalcts the trial swings around the lower end of the lake and then passes through the timber along the north shore of the lake. Above the lake the trial turns to the right to climb through the north fork valley, seconding quite rapidly to the typ, seconding quite rapidly to

Another beautiful ride is the trip to Upper Two Medicine, a lake well stocked with rainbow trout. This trail is the same as the Dawson Pass route to the head of Two Medicine where the south branch is followed past Twin Falls.

Still another delightful ride is along the south shore of Two Medicine and up through the valley of Cobalt Creek to Cobalt Lake, another mountain tarn that nestles in a deep cirque immediately under the rammaris of the Divide

From Two Medicine Chalets a motor launch makes regular trips, transporting those who hike with a ranger-naturalist as guide from the end of the lake to visit Twin Falls and view Pumpelly Pillar And the trout fisherman need not go far from the chalets for his smoot.

GOING. TO. THE SUN CHALETS

Hub of many memorable trail rides, hikes, climbs

The Going-to-the-Sun Chalet group is the largest in Glacier Perk. It is located on a high promentory at the base of Goat Mountain on the north shore of Upper St. Mary Lake. From its porches magnificent panoramas of take and mountains stretch out on every side, while high above, the snowfields of Gome-to-the-Sun slisten. on the aunlight

For the biker and horseman Going to-the-Sun Chalets are second only to Many Glacier Hotel. for Sun Camp, as this place is commonly known, has been called the heart of Gagner Park. Every one of the longer scheduled tours can be made from this place. The Toungle Trip can be made via Many Glacier Hotel, Granite Park Chaleta and return to Sun Camp via Logan Pass. The North Circle can also be taken from here by way of Logan Pass to Granite Park Chalets

From Going to the Sun Chalets a trail leads around the head of St Mary Lake and up Red Eagle Creek to Red Eagle Lake, one of the best fishing lakes in the Park. The trip to the lake and return requires two days, but fishermen find this an advantage as it gives them the better fishing of the late afternoon and early morning hours. Tent accommodations are provided at Red Eagle Laxe for them

An interesting short side-true from Going to the-Sun Chalets is the five-mile round trip. , hike or ride; to St. Mary Falls. St. Mary Falls are well worth the trip and the scenery along the trail is very beautiful. Other half-day trips lead to Baring Basin and Vicginia Falls.

One of the best of the day trips leads westward along the lake to Baring Falls and then up through the basin between Going-to-the-Sun and Goat Mountains to Sexton Glacier Sun Rift Gorge and many small waterfalls are passed on this trip and mountain goats are likely to be seen on the higher slopes.

Another beautiful one-day trip takes you to Florence Falls, a huge waterfall deep in the woods. These falls are a succession of terraced an llways extending as far back into the woods as you can see. They are only six miles from the chalets up the St. Mary River valley and many marvelous vistes of lake and mountains are pareed on the treal

A third one-day trip leads eastward along the lower alones of Gost Mountain and up Roes Creek to Ross Basin with its excellent fishing and wide outlook over the footballs and plains

Hidden Lake is also one of the beauty spots that can be made as a one-day side-trup from Going touthe Sun Choleta. The route followed is over the Logan Pass trail to the top of Logan Pass, then south on a branch trail arry ad Clements

Two more regularly scheduled ade-trips may be taken from Gome-to-the-Sun Chalets, both of which follow the same trail. The shortest of these takes a day and ones to Counsight Lake and Pass and return while the other is the turn-day trip to Sperry Chalets and return. The trail leads first along the north shore of St Mary Lake and up the St. Mary River valley to Gunsight Lake. Here the mountains use pearly a mule above the lake and to the south an excellent view is to be had of Blackfoot Glacier, the largest in the Park. Leaving Gunsight Lake the trail climbs rapidly up through Gunsight Pass. claimed by many to be the most spectacular in the Park, and descends to Lake Ellen Wilson. before climbing again through Lincoln Pass to the cozy hospitality of Sperry Chalets

Mountain through the Banging Gardens to

SOUTH CIRCLE TRID

A 5-day ride... by easy stages

Starting from Gong to-the-Sun Chalets the first day's ride is eighteen miles over Piegan Pass and down to the Many Glacer Hotel Piegan Pass is noted for its wild flower meadows, magnificent vistas and the unforgettable thrill of passing alongside the Garden Wall which rises 4.000 feet above the trail

The second day's coute is along the Swiftcurrent valley up to the Devil's Elbow, and westward to the Great Davide, and the Chalets at Granite

After lunch climb the trail to the top of the Garden Wall above Grinnell Glacier, or walk up Sanftenent Beak The third day you head westward for McDonald.

the Park's largest lake. With the morning nearly sone you reach McDoneld Creek. Another ten miles along the rapids and through the thick-set, moss-growing forests of the west side, finelly bring you to the lake.

On the fourth day you climb to the Divide again -only seven miles to go this morning-but such miles! After breakfast at 3.100 feet, you lunch and done and sleep at Sperry Chalets-6,500 feet up in the land of mountain gosts and placiers

In the afternoon you're free to visit the Sperry Glacuer with its distant vistor in all directions

The fifth day brings you back to Sun Camp, over Gunsight Pass, the climax of the South Circle tnp. The trail hangs on beetling cuffs and passes over slanting anow fields, in plain view of Blackfoot Glacier The last nine miles are down the valley of St. Mary River and along the shores of St. Mary Love to the Chalets

(The South Circle Trip can also be started from Many Glacier or Lake McDonald Hotel.)

The MANY GLACIER Region

The Many Glacer Hotel is the focal point of the wonderfully interesting Many Glacer region

The bush plate glass windows of its lobby and its wide porches look out across Swiftcurrent Lake to marvelous views of rugged peaks of the Continental Divide, Mt Gould rearing its head over 9,500 feet into the air, the Garden Wall with Grinnell Glacier nestling in a high pocket on its eastern slope, Grinnell Mountain rinng abruptly from the far side of the lake, then the valley of the Swiftcurrent ending m the steep wall of Swiftcurrent Pass, and lastly the two sentinels that guard the north ade of the valley, Mt. Wilbur and Altyn Peak. Innumerable other peaks loom on every side, their uppermost slopes glistening with patches of snow and their feet banked on every side with evergreen

One thinks in retrospect of Many Glacier in terms of blue lakes and green clad shores.

of the great rock masses of grey and red forming the mountain setting, of the abrunt ledges of the Garden Wall and the Pinnacle Wall and the white contrast of Grannell Glacier But the best of the Many Clamer region from the acenic angle is found in the great glacial circues or rock amphi-theatres holding Grinnell Glacier and Lake, also Iceberg and Cracker Lakes. These wonders are forbidden to any but the hiker or those who ride. Thanks to the Saddle Horse Company however, it is possible to make either the Iceberg or Cracker Lake trip in half a day, although it is far more satisfactory to devote an entire day to each of the above-mentioned trips and thus really ensoy them to the utmost

Who can forget his first glanier excursion, coming, as it does, after a ride of thrilling grandeur! First, the trait along beautiful Josephine Lake, the gradual ascent through the timber to Grinnell Lake, then that studendous vista across the grey-green lake.

The natural center of numerous short trips

to the huge cliffs at / its upper end, the tumbling cascade from the glacier over hanging on the cliffs above the lake. How near it seems, and yet how far away, as we climb the switchbacks along the face of Grinnel, Mountain. And then the glacier with its huge moraine, its ice caves and its crevages. The stude will take you, roped together, up over the serrated surface of the soe-field to the edge of the great put, dug out by the cascade from the upper glacier Yes, by all means, take the Grinnell Glacier trup of that is to be your only saddle-horse trup while in the Park. For those new to the saddle and designs to break themselves in gradually, the shorter trip following this same trail along the shores of Tosephine and Gridnell Lakes in most excellent

The Crucker Lake trail is also full of beauty. The path along Canyon Creek the rock wall of Sayeh, towering 4,000 feet after above you, the deserted Crucker Jack mane, with its stories of proneer days, the hanging glaciers of Sayeh, alpine wide flowers and dwarf alpine trees, the mountaintens of the stories of the sayer of the s

Iceberg Lake is another inversified-organized properties againstee Choteng Lake deserves for name, for it nestees under the childs of guideline the control of the child of th

River country, a terra incognito except to him who ndee or hikes.

Many other trips can be taken from Many Glacers if one has the time and inclination. There are the one-day trips to Morming, Eagle Falls and Piegan Pass and return, and over Swiftcurrent Parks to Granter Parks.

For the person who has only a few days to see the grandeur of Glacser Park, the best and ment concomonal way is to take some of the organized trips that are planned by the Saddle Horse Company—for example the Trisagle Trip over Swiftcurrent, Logan and Patgan Paises. Heaven's Peak Granite Park

THE Triangle

Leaving from Many Glacier, the first morning is spent in ascending the Swoftcurrent valley to Swiftcurrent Pass. Here are the mountains at their best Granite Park Chalets are reached in time for lunch. The chalets are perched on the steep sides of the Continents. Divide and the view to the west is superb, with Heaven's Peak dominating the landscape and a score of other peaks poling up on the western horizon. If one is a walker the trail to the top of the Garden Wall should be taken in the afternoon. Gruppell Glecier her at your feet, with a fac stretching view toward Many Glacier and beyond By turning about to face west the whole panorama of peaks from Mt Oberlin on the south to Sunforcement on the north rolls below us

Morning finds as on the trail again, this time headed southward along the Garden Wall to Logan Pass. This trail hangs on the western slopes of the Continental Divide with a view far out over the pacturesque valley of Logan Creek. Lonch

and coffee are had what yust over the summent of the Divide, with the Hanging Gardens and the peaks around Huiden Lake a full view. Then down into the St Mary Valley, past the falls of Reynolds Creek and into the timber to the shore of St Mary Lake, from whence a short rode brings us to the hospitable Going-to-the-Sun Chalets for our evening meal.

Next day the trail leads up Reynolds Creek along the west rise of Gonget-cit-be Sun Mountain, which case nearly 5,000 feet vertically above us, and then swings over to the slapes of MT Styck for the climit not will also specially be suffered to the slapes of MT Styck for the climit not will and open, look cut for mointain sheep and goats, for you are quite likely described to the seasons them. Then the sharp described toward Many Ocacur, lovely Morning toward Many Cacur, lovely Morning and all the glocies of a setting sun, turquous Sunfearrent all the Many Glocar Motel again, exerning the

Climbing Belly River

9ndian Pass_

THE North Circle Trip_

For the traveler who has a little more time, for the fisherman and the mountain lover, the Saddle-Horse Company has planned a wonderful five-day tour known as the North Circle Trip. No one who visits Glacer Park can long excape hearing of the won derful fishing in the Belly River Country of sublime Mt Cleveland, highest peak in the Park, of stuming Indian Pass and the

camp at Crossley Lake.
The trip is usually made in five days from
Many Glacier Hotel. (It can also be made
from Gong-to-the-Sun Chalets or from the
Lake McDonald Hotel > In either case the
first day's iourney is us to Granute Park

Starting from Many Glacter Hotel the first day is an easy start of nine miles to Granite Park Chalets. The second morning we follow a skyline trail paralleling the tumber line on the west slopes of the Continental Divide, with an optional short side-trip en route, that takes us up to Ahern Pasa and its marvelous vistas of the south fork of the Belly River Late aftermoon we

swing over onto the stop. He so (West Flas.)

Fifty Mountain Camp, close under the pan at the pide at

After a hearty brakfart we are no our way again. Still northward and once more down mountain slopes. This time it is the valley of Waterion Rever we follow down to Goat-our and the slope of the slope

North Circlescorrance

the camp. Here fishing may be had at the mouth of the Waterton River, a stone's throw from our tents, while a trip up toward Browns Pass to Lakes Janet or Francis will give the fisherman a series of rea. battles with the big rambow trout of this resine.

thus region The fourth day in the saddle takes us back over our old trail for about five miles and then up a steep ascent to beautiful Indian Pass. If Gunsight is the most thrilling pass in Glacier Park, then Indian is surely the most beautiful. Up past the deep blue Indian Lake, up the switchbacks to the bare summit of the Pass, where a view unfolds that once seen will never be forgotten In front of us the cliffs of Mt. Krop, with a wonderuful series of cascades dropping down from the glacter above. Below and to the east opens up the wonderful valley of the Belly River, with Glenn's Lake and Crossley Lake filling the middle distance. And as the trail winds down into the valley we are almost under the spray from the many lovely waterfalls that firng their way down the rugged slopes. The last few miles of our trail lead through the forest, with glimpses of mountain peaks and blue water Crossley Lake Camp looks southwestward to the Pass over which we have just come. with Mt. Cleveland to the right and Mt Merritt to the left, framing a glorious picture

Meritt to the lett, framing a gorious pecture.
This camp opens up the Belly River, famed for fighting rainbow and bug cutthroat trout. There are enough lakes and streams here to fish a different one every day for a month.

Our last day on the saddle, the trail crosses Belly River several tunes, leads past Dawn Max Falls and Lake Elizabeth, set us green magan Wall, with its thrilling retrospect of Mt. Merritt, and through the new trail tonself to energe above Prarmagan Lake Company and the second of the second of the Swiftcurrent valley and Many Glacer Hotel in the mellow mountain whight these are memores of that last day's trap green and the second of the second of the second process advertised to the second of the second process advertised to the second of the second of the green second of the second of the second of the green second of the second of the second of the green second of the second of the second of the green second of the second of the second of the green second of the second of the second of the green second of the seco

Lake McDonald where

From Lake McDonald Hotel, the Park Baddle Horse Company originates its scheduled tours. While the Glacker Park Transport Company operates its buses and cars over the highway through Logan Pass to the east side of the park, the SaddleHorse Company follows either one of two trails one via Sperry and Going-to-the-Sun, the other via Granite Park. These trails lead also from Lake McDonald to the longer trail trus already described.

Many beautiful one-day trips are available from Lake McDonald Hotel to Speric Chalets and Glacier, to Avalanche Lake, to the summit of Mt Brown and to Lincoli Peak among others. The trout fisherman seeks Snyder, Avalanche, and Fish Lakes

Up to the northwest are the long, slondelakes, characteristic of Glacier Parik's western slopes Logging, Quartz, Bowmar and Kuttls This northwest section is still practically a primeral widerness, and a wild animal sanctuary that can be visited only by organized camponing parties.

Sperry Chalets

Up where mountain goats bose for your camera

An easy ride or walk of seven miles from Lake McDonald Hotel is Sperry Chalets. May we quote from a personal diary to

describe it "The trail is soft underfoot. Tree trunks rise strenght and tall. The underbruth seems all bernes and flowers. The ranger naturalist service has identified different trees, shrubs and flowers with small tablets. The sun slants golden lances through the green roof above. We haven't a care in the world at least, none that we can remember We trot through lovely leve. forest assles. We walk up steep grades. We breath deep of aromatic ozone. Birds sing vespers in this world of calm contentment. A grouse calls. A marmot whutler Twinght fills the valley below us. The sun Imgers on the mountains to the eastward High above we see the lights of the chaset We come to the last switchback that leads up to its level. We arrive in the dusk. A coxy, hosp table place. Still, remote, utterly beautiful. The supper tastes like a feast With our appetites it is a feast. We sit by the fire in the stone chalet, drinking a toget to the pure mountain night. We hear something outside. We use our flashlight and discover mountain goats just outside our door, browsing in the bear grass. We tip-toe out with our cameras. We set off a flashlight-and the wary mountain youts keep right on browsing. They know they're safe in Giacier National Park."

Equally interesting comments could be quoted regarding each of the trails, chalets and camps in Glacier Park.

There is an easy trail north from Sperty Chalets to Sperty Glacuer and the top of the Continental Divide. Another easy trail leads south to Lincoln Peak. From these wantage points you look down on glory wantage to the second of the second of the Ether of these short trips can be made in a half day.

AND KNOW Peace.

A WORD ABOUT Camping Trins Look at a map of Glacser National Park art of Camp (cookery, 6

and you will see that through every mountain pass and down into every valley of importance runs a trail. Some lead to points of interest close to chalets and hotels. while others lead far from the baunts of man to little known lakes and primeval forest areas hemmed in by mile high barmers of red argillite and vellow lunestone.

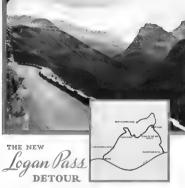

These wilderness valievs are paradises for those nomadic natures who spend their vacations with camp outfit and pack-horse In this Land of Shining Mountains there u no particular hardship entailed in a vaca. tion of this kind. In the Land of the "Northwest Mounted"

The PRINCE OF WALES HOTEL

facing Glacier Park toward the South

The Canadian government, like that of the United States, has set saide regions of most unusua, beauty as National Parks Water ton Lakes National Park embraces the Canadian Rocky Mountain area imme diately north of the international boundary hoe and adjoining Glacier National Park Waterton Lake, a long and narrow body of water, lying partly in each country, crosses the boundary line and links the two parks. At the porth end of this lake-"superbly situated on the rocky promontory that forms the Narrows, is the attractive hotel (Prince of Wales Hotel). The building is designed in the Swiss Chalet manner, a style in harmony with its setting, and that succeeds in carrying somehow a subtle wel-

come to the incoming guest. Every window frames a giorious view, to the south over the sunlit lake, to the north to the foothills and the prairie lands beyond." (Quotation from "Waterton Lakes National Park" by

N. B. Wilson.

Trails radiate from the Prince of Wales.

Hote, in all directions. The park contains.

150 miles of trails, "broad, well made and so safe that not even the most timorous need feel alorn. Nearly a score of trips can be arranged. .covering from one to three or lord days. The park a so compact that many visitors find it the best plan to cover usef reasonable with the park and the confidence of the park and the confidence of the park and the par

magnificent scenery to charm the eye

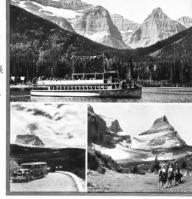

"One of the main characteristics of the park is the beautiful colouring of the rocks," according to the official report issued by the Canadian Department of the Interior. "Bands and splashes of tawny gold, greens, wine colours darkening to purple, make some of the peaks look like a futurist painting, and give to the whole region a warm. and colourful appearance. In the northwestern part of the park is the curious Anderson peak, with its sharp pyramid formed of vellow shales, which at sunrise and sunset glisten like pure gold so that the mountain is facetiously known as the 'millionaire's peak.' Others have summits of a warm red or beautifully banded slopes." Elsewhere in the conservative official report. Waterton Lakes Park is described as follows: "sheer poetry of lake, peak, and green forest, stretching away as far as the eve can see into blue, serial distances, in such beauty as brings pain to the throat, a sudden smart to the eyes." Visitors to Waterton and the Prince of Wales Hotel are offered lake bathing, boating, golf and climbing as well as superlative trail riding and biking. Waterton Lakes Park offers an ideal "retreat" for those who wish to settle down for the enjoyment of simple outdoor life. It is off the beaten path, yet easily accessible to the Great Northern Railway main line. Peacefulness and beauty abide here and they offer sanctuary from worry and hurry, fear and discontent.

NORTHERN LIGHTS and SHINING MOUNTAINS

come this summer you will always be glad

Probably nowhere else in the world have two neighboring nations established adjoining national parks in order to preserve a region of such beauty as this Land of Shining Mountains—where the Northern Lights sometimes shimmer over Canada on cool summer nights. Waterton Lakes Park is on the daily schedule of buses from Glacier Park Station on the Great Northern main line. The new inter-park highway passes close by Chief Mountain—majestic sentinel standing guard over two friendly nations—near the International boundary.
